

The Mound Science and Energy Museum (MSEM) is pleased to announce that on February 26, 2014, Ken Phipps will discuss and show the one-hour PBS' presentation "The Man Who Saved the World."

For four hours on Oct. 27, 1962, the world held its breath, when the Cuban Missile Crisis was at its most perilous. This feature tells the powerful but forgotten story of Vasili Arkhipov and Soviet submarine B-59. "The Man Who Saved the World" combines tense drama with eyewitness accounts and expert testimony about some of the most critical events in the Cold War.

Ken will discuss the event and hold a Q&A session. Ken received a BA in Chemistry from Southern Illinois University, Carbondale in 1960. He was employed at the Mound from 1960-1962 as a Development Chemist, then as a Development Supervisor. He also served six years as SW Building Manager.

This presentation will occur on Wednesday evening, February 26, 2014, at 7:00PM at the Mound Science and Energy Museum, 1075 Mound Road, Miamisburg, Ohio 45342. The museum is located directly across Mound Road from the historic Adena Indian Mound. For additional details contact: Ray Seiler at 937-434-5280, or by e-mail at rseiler711@me.com. See the MSEM Internet web site, <http://www.moundmuseum.com> for a map showing the location of the museum.

We invite you to come for Ken's presentation, but also take time to see the various changes being made to our Museum. **THE MOUND SCIENCE AND ENERGY MUSEUM IS GROWING AND GETTING BETTER EVERY DAY!!!**

Our next Wednesday Night Presentation, on March 26, we will have Brady Kress, President & CEO of Dayton History/Carillon Historical Park, as our speaker. He will provide us with an update on their latest happenings and upcoming events.
