“The DOE Office of Legacy Management And Long-Term Stewardship”

January 22, 2025 7:00 pm

Mound Cold War Discovery Center, 1075 Mound Road, Miamisburg, OH

Summary:

Since 2012, the U.S. Department of Energy’s Office of Legacy Management has had long-term stewardship responsibilities at the Mound Site in Miamisburg, Ohio. Learn about the broader Legacy Management mission and how it came to be.

The Office of Legacy Management was established in 2003 to manage DOE’s post-closure responsibilities and to ensure the future protection of human health and the environment through long-term stewardship. The histories of legacy sites vary, as do the regulatory regimes under which they are managed. Today, the Office of Legacy Management has responsibilities for over 100 sites associated with the Manhattan Project and the Cold War, spread across the country from Alaska to Puerto Rico.

Speaker:

Padraic Benson— He joined the U.S. Department of Energy (DOE), Office of Legacy Mgmt. in 2013. He serves as a program analyst, based out of the LM Operations Center in Westminster, Colorado. Padraic began his federal career with the U.S. National Park Service in 2009 and spent 3 years in Washington, DC, at the Frederick Douglass National Historic Site, home of the famed nineteenth century abolitionist.

For additional details call 937-353-4457. The presentation is free and open to the public and has ample free parking.
